Golden Anniversary Greeting

DEAR FRIENDS:—

Fifty years ago (in 1881) my father, Frank Ford, the founder of Ford Seed Co., issued his first annual catalog, using the motto, "SQUARE DEALING, LIVE AND LET LIVE." Through all the years since that time this motto has been adhered to and has been the principle upon which our business has been conducted.

Our aim now and always has been to sell only the best, at prices as low as consistent with high quality.

In this, our GOLDEN ANNIVERSARY year we are trying to outdo all previous years, by supplying even better seeds, bulbs and plants at

J. H. FORD—The man you deal with and one who highly appreciates your friendship and liberal patronage.

MRS. J. H. FORD—To whom the names of thousands of the customers of Ford Seed Co. are familiar, as she has had charge of the books for thirty-two years.

prices which are within the reach of all and in all cases as low as possible.

We want to be helpful and of real service to our customers in every possible way.

Your patronage and kindness to us is appreciated more than words can express. We thank you one and all and assure you that we will put forth every effort to give you perfect satisfaction if you place your orders with us.

Our SPECIAL GOLDEN ANNIVERSARY bargains, offered on nearly every page of this catalog, will appeal to all who receive a copy.

We hope that the HIGH QUALITY of our seeds, bulbs and plants, together with the low prices we are making, will make it possible for every one who receives our GOLDEN ANNIVERSARY catalog, to place an order with us.

We wish you a *Happy and Successful* year in 1931.

Yours for Better Seeds,

J. H. FORD,

Pres. and Mgr. Ford Seed Co.

Ravenna, Ohio, 1931.

Ten Reasons Why You Should Plant Ford's Sound Seeds, Bulbs, Plants and Perennials.

1. **BECAUSE**, They are selected from the Best Strains of the Best Varieties. Our aim is to eliminate all varieties not having outstanding merit.
2. **BECAUSE**, Ford's Sound Seeds are tested. None but those showing satisfactory germination are sold for planting.
3. **BECAUSE**, We carefully adjust all complaints for anything bought of us that is not perfectly satisfactory when received.
4. **BECAUSE**, We give more good seeds for the money sent us than are offered by others.
5. **BECAUSE**, We give the full value of the money sent us in seeds, bulbs, etc., instead of colored pictures, high city rent and other unnecessary expenses.
6. **BECAUSE**, Our 50 YEARS IN BUSINESS has taught us the needs and requirements of our customers and enables us to handle orders satisfactorily.
7. **BECAUSE**, We refill order or refund money for any seeds that under favorable conditions fail to grow. (If you should ever have occasion to enter a complaint, give date of planting, condition of soil and weather, amount and variety ordered, number of order, stock number appearing on the package and price paid for same.)
8. **BECAUSE**, We give DISCOUNTS as follows:
 On orders amounting to \$ 10.00 or over, 2%.
 On orders amounting to \$ 25.00 or over, 3%.
 On orders amounting to \$ 50.00 or over, 4%.
 On orders amounting to \$100.00 or over, 5%.
 These discounts make our prices very low.
9. **BECAUSE**, We try to be of real valuable service to each of our patrons, giving such information and help as we are able to render to make their garden operations pleasant and profitable.
10. **BECAUSE**, For 50 years we have endeavored to treat our customers, whom we consider our friends, as we would have them treat us. Hundreds of them have bought from us for many years and have been perfectly satisfied. Our "live and let live" policy will be continued. We want to extend the courtesies of our organization to all who receive this catalog and count each one as a friend. We will do our part to make this friendship worth while.

Make first sowing as soon as the ground can be worked and continue to sow what may be needed once in three weeks until the last of July.

PRICES on Beet seed quoted below include postage. If to go by express or freight deduct 3c from $\frac{1}{4}$ lb., 10c from lb., 18c from 5 lbs., 28c from 10 lbs.

Ford's Ideal. We consider this the best of all beets. It will give you the finest beets that can be grown for home use or market. The roots are turnip-shaped, deep rich red, very tender and of a sweet, delicious flavor. Leaves mostly dark red. No picture can do justice to the Beet itself—you must try it to know how good it is. They are hardy and can be planted early, so that they mature for the early market. If planted later in the season they can be stored for winter use and will retain their freshness for a long time if packed in sand or stored in a pit. Pkt. 10c, oz. 15c, $\frac{1}{4}$ lb. 38c, lb. \$1.00, 5 lbs. \$4.18, 10 lbs. \$7.78.

Crosby's Improved Egyptian.

Of this beet we have a strain that is second to none in any respect. Quick-growing; best quality; for forcing or outdoor sowing; regular roundish; dark red color. Pkt. 5c, oz. 11c, $\frac{1}{4}$ lb. 33c, lb. 85c, 5 lbs. \$3.68, 10 lbs. \$6.28 prepaid.

Morse's Improved Detroit Dark Red.

Same shape as the original strain described above. By careful breeding and selection the type has been fixed. The tops are of a uniform gray green color. The roots are smooth and true to type. Its greatest claim to superiority is the deep uniform blood color of the flesh of the roots. It is not only clear blood color, but the deeper rings are quite inconspicuous. The texture is fine grained and the flesh is crisp and sweet. Pkt. 10c, oz. 15c, ¼ lb. 43c, lb. \$1.30, 5 lbs. \$5.68.

EARLY BLOOD TURNIP. Smooth, dark red. Same price as Detroit Dark Red.

SWISS CHARD

The leaves and stalks are used for greens. It can be used all summer, when spinach is gone. Later the leaves grow very large, and the white midribs may be cooked like asparagus. Also called Silver Beet, Sea Kale, and Celery Beet. Treat same as beets.

LUCULLUS. This Chard grows from 2 to 2½ feet tall. The leaves are crumpled; the stalks are thick, somewhat resembling rhubarb in appearance. Both the leaves and stalks are crisp and tender and of the finest quality. Prepaid Pkt. 5c, oz. 10c, ¼ lb. 28c, lb. 75c, 5 lbs. \$3.68, 10 lbs. \$6.28.

Mangel Wurzels and Sugar Beets

Deep soil produces the largest crops. Sow in rows 18 inches to 2 feet apart, ¾ inch deep, and when the plants are 3 or 4 inches high they should be thinned out 6 or 8 inches apart. Transplant when the ground is moist, pinch off the leaves about 2 inches above the root, and set the plants into the soil up to the crown. On good, deep soil 1,000 to 1,500 bushels per acre can be raised. Mangels make excellent feed for stock of all kinds.

Ford's Glad Gardener says "Plant more Wurzels"

Ford's Danish Yellow. After being thoroughly tested by the Denmark Agricultural Trial Station, was awarded a "Certificate of First Class," and is considered the most nutritious Mangel for stock-feeding. The roots are long, ovoid, of fine yellow color, and grow to large size. Yields 25 to 50 tons per acre. Our patrons are highly pleased with this variety. It is proving satisfactory wherever grown. We consider it the best of all. Pkt. 5c, oz. 10c, ¼ lb. 21c, lb. 65c, 5 lbs. \$2.68, 10 lbs. \$4.78 prepaid.

MAMMOTH LONG RED. Grows to an enormous size in deep, rich soil; is an excellent keeper. Various reports from our customers who have grown it show yields of 1,400 to 2,000 bushels per acre. Close-grained, tender flesh of rich flavor. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 60c, 5 lbs. \$2.43, 10 lbs. \$4.58 prepaid.

LANE'S IMPROVED SUGAR BEET, OR KLEIN-WANSLEBEN. Nearly as productive as the Mangels, and very rich in sugar—the best of Sugar Beets for stock-feeding. Same price as Mammoth Long Red.

GOLDEN TANKARD. Yields enormous crops; very rich in sugar; skin and flesh deep orange-yellow; oblong in shape. Same price as Mammoth Long Red.

MIXED VARIETIES OF MANGELS AND SUGAR BEETS. All varieties. Same price as Mammoth Long Red.

CHICORY

Witloof, or French Endive. Sow in April in the open ground, in drills 10 to 12 inches apart in deep, rich soil. Allow the plants to grow until November. Then take up the roots, trim off the leaves to about 1½ inches from the neck, plant in any convenient place in cellar where it does not freeze, about 1½ inches apart. If cellar is light cover the crowns with 6 or 8 inches of light soil, if dark it will need no covering. In four or five weeks the new leaves will attain proper size to make excellent salad. The roots may be dried and ground and make a good substitute for coffee. Pkt. 8c, ½ oz. 15c, oz. 25c, ¼ lb. 53c, lb. \$1.85.

CORN SALAD

LARGE ROUND-LEAVED. Sow the seed in August or September in very rich soil, rows 1 foot apart; cover not over ¼-inch deep; roll the ground to secure good germination; cover when cold weather approaches with coarse litter. CABBAGE

Cabbage seed has been a specialty with us for years, and our customers say the seed is good, because they get good results, and that is always the final answer. One customer wrote us that "From one and one-half acres of Glory Cabbage we sold \$650 worth." Another writes that from 1,000 plants grown from Ford's Seed he raised 1,000 solid marketable heads. If space permitted, we could print hundreds of testimonials from our customers, about our cabbage seed.

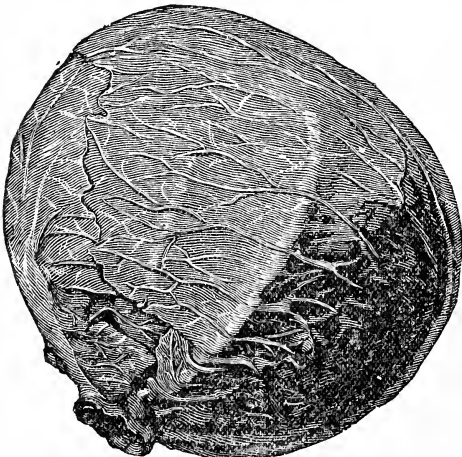

HOW TO GROW CABBAGE.

For early, the seed should be sown in hotbed in March. For general crop, sow seed the latter part of May in open ground and in July transplant into rows 2½ by 2 feet or more for large-growing varieties; cultivate often.

Ford's Glad Gardener says, "Glory is the Best Cabbage."

FORD'S GLORY CABBAGE

Highest Quality of All

Our Most Popular Cabbage—An Every Purpose Variety

THE BEST OF ALL CABBAGES. Glory has proven satisfactory wherever it has been planted. It matures quite early—about as early as the **Copenhagen Market**, but makes a larger head than that variety, is very solid and does not burst badly. The stems are short, heads almost round, slightly flattened at the top and are extremely solid, with very small core. There are few loose leaves, which is a great advantage, as the plants may be set very close together. The heart is white crisp-fine-grained, and tender, and cooks quickly. Owing to its earliness and the hardness of the heads it is an unusually good market sort. If the seed is sown in this latitude between June 1 and 10, it will produce excellent heads for winter use. It always sells for top price in market. The best of all for Kraut. Pkt. 10c, ½ oz. 20c, oz. 32c, ¼ lb. 88c, lb. \$3.10, 5 lbs. \$14.18, 10 lbs. \$27.78 prepaid.

EARLY JERSEY WAKEFIELD. Very early, pointed heads, fine well known variety for market. Our seed is of an extra choice strain. Pkt. 7c, ½ oz. 20c, oz. 30c, ¼ lb. 78c, lb. \$2.60, 5 lbs. \$11.43, 10 lbs. \$21.28 prepaid.

WISCONSIN HOLLANDER No. 8. A "Disease Resistant" strain of the famous Danish Ball Head. It is the result of years of selection of disease free plants grown on infested fields where it withstands the ravages of "yellows" and produces a big crop. In all other respects it is similar to the Danish Ball Head. Our source of supply is reliable and we recommend this variety to our friends who have had trouble with the "yellows" disease. Pkt. 10c, ½ oz. 20c, oz. 30c, ¼ lb. 98c, lb. \$3.50.

Copenhagen Market. Very early, maturing only a few days later than Early Jersey Wakefield. Heads round, medium size, fine quality, sound. A very popular early round headed variety. Ships well on account of its round solid heads. Pkt. 10c, ½ oz. 20c, oz. 32c, ¼ lb. 88c, lb. \$3.10, 5 lbs. \$14.18, 10 lbs. \$27.78.

Golden Acre. This might be called an Extra Early Copenhagen Market, as it resembles and is a selection of that variety; but about 5 days earlier, maturing at same time as Wakefield. Making it the earliest round head cabbage in existence. Heads medium size, solid, does not burst badly after maturity. Pkt. 10c, ½ oz. 25c, oz. 45c, ¼ lb. \$1.53, lb. \$5.10.

LARGE JERSEY WAKEFIELD or Charleston. A few days later than Early J. Wakefield, a little larger, otherwise very similar. Same price as Early J. Wakefield.

Danish Ballhead. The most popular late variety. A particularly good variety of Danish origin and much prized by American growers on account of its solidity and great keeping qualities. It may be heeled in the fall, and in the spring will be found to have retained its fine quality. Our seed is the solid-headed, short-stemmed type. Pkt. 10c, ½ oz. 20c, oz. 32c, ¼ lb. 88c, lb. \$3.10, 5 lbs. \$14.18, 10 lbs. \$27.78.

PENN. STATE BALL HEAD. A highly developed and improved strain of Ball Head, representing ten years of careful breeding by the Penn. State College. It produces more tons per acre and is less subject to disease than the original strain of Ball Head.

The much larger crops grown from this variety will justify our customers in paying the higher price asked for it. We are confident you will be highly pleased with its quality and the big profits it will return to you. Carefully grown and selected seed. Pkt. 15c, ½ oz. 40c, oz. 75c, ¼ lb. \$2.28, lb. \$7.10.

DRUMHEAD SAVOY. The best of the Savoy cabbages, beautiful crumpled leaves surround the solid head, crisp, tender and of fine quality. Pkt. 7c, ½ oz. 20c, oz. 30c, ¼ lb. 83c, lb. \$2.75.

MAMMOTH RED ROCK. The largest and best of the red cabbages, used largely for pickling. Heads round, solid, weighing 10 to 12 lbs., deep red and very beautiful, fine quality. Pkt. 7c, ½ oz. 20c, oz. 30c, ¼ lb. 83c, lb. \$2.75.

HOUSER. Very late; heads weigh 10 to 15 pounds apiece; they do not burst easily, but are late, crisp and tender; a splendid variety, plants can be set close. Pkt. 10c, ½ oz. 25c, oz. 40c, ¼ lb. \$1.43, lb. \$4.10.

CAULIFLOWER

Suhr's Early Snowball

(Ford's Early Snowball)
The Best Strain of Snowball

In the Spring of 1929 we sent out several hundred packets of this variety under the name of Ford's Early Snowball, to distinguish it from other strains. All who have reported, express themselves as highly pleased with the variety, although it was very dry in many sections. These reports speak of it as "very solid," "white," "fine quality." Nearly all plants produce good solid heads.

This variety has won first prize at the conventions of the Vegetable Growers' Association of America at least three years. The illustration shows the exhibit of 1928, which won first prize at South Bend, Ind. Note the beautiful appearance of the heads.

The Suhr's Early Snowball has outstanding merit from every standpoint. Its large, pure white, very solid heads, of finest quality, make it the ideal cauliflower for mar-

ket and home use. The leaves are sufficiently large to easily protect the heads when tied over them.

It is suitable for either early or late crop. We consider this the best all round cauliflower we have known and recommend it to all growers with the confidence that it will give entire satisfaction to all who plant it.

Market gardeners especially will be pleased with the Suhr's Snowball because it produces such a large per cent of marketable heads that will sell for the highest price.

Sow seed for late Celery in seed-beds in April or May.

Wonderful or Golden Plume Celery

Wonderful. The Most Popular of All Early Market Varieties of Celery. It has created a sensation wherever grown, on account of its large size, (see illustration) extreme earliness, maturing about two to three weeks before other varieties and blanches very quickly. Our strain of seed has given perfect satisfaction to our many friends who have used it. Pkt. 10c, $\frac{1}{2}$ oz. 60c, oz. \$1.00, 2 oz. \$1.80, $\frac{1}{4}$ lb. \$3.53, lb. \$10.60.

We suggest that our celery grower friends try this new celery out. We believe you will find it a decidedly fine variety. CARROTS

Choice Seed for the Most Critical Gardeners

For an early crop the seed should be sown from the first to the middle of April, and for the later crop about the first of June. The seed should be planted in drills about 14 inches apart, covering about $\frac{1}{2}$ inch; when the plants come up, thin to 4 inches apart in the row. The soil should be fertilized the fall preceding. Fresh manure should never be used. Cultivate at frequent intervals if you wish your crops to mature quickly, or if extra large specimens are desired. An ounce of seed will sow 100 feet of drill; 3 to 4 pounds for one acre.

Prices quoted include postage. If to go by exp. or freight, not prepaid, deduct 3c from $\frac{1}{4}$ lb., 10c from lb., 18c from 5 lbs., 28c from 10 lbs.

Chantenay.

This is one of the most popular of all carrots. It is half-long as shown in the illustration. Our strain of this popular carrot is exceptionally choice. It grows about 6 inches long, 2 inches thick at top, deep orange-red color, smooth, handsome and of extra fine quality. Fine for market or home use. Pkt. 6c, oz. 12c, $\frac{1}{4}$ lb. 33c, lb. \$1.00, 5 lbs. \$4.18, 10 lbs. \$7.78.

OXHEART or Guerande. Grows 5 inches long by 3 to 4 inches in diameter at crown; stump rooted. A big yielder on shallow soil. Not equal to Chantenay or Danvers as a market variety on account of its shape. It is of good quality, however. Pkt. 6c, oz. 12c, $\frac{1}{4}$ lb. 33c, lb. \$1.00, 5 lbs. \$4.18, 10 lbs. \$7.78.

Chantenay

Coreless Carrot

Coreless. A strikingly beautiful, very early carrot. Roots are deep orange color, exceptionally smooth, cylindrical in form, 6 inches long by $1\frac{1}{2}$ inches in diameter. Free from woody heart or core, and of the highest quality, sweet, crisp and tender. We recommend the Coreless to market gardeners for summer and early fall. Our seed is produced from a carefully selected strain, which is second to none. Pkt. 8c, oz. 16c, $\frac{1}{4}$ lb. 48c, lb. \$1.35, 5 lbs. \$5.18, 10 lbs. \$9.78.

Morse's Red Cored Chantenay.

This new carrot is similar in shape to the well known Chantenay, has the sturdiness and fine qualities of this variety, but is the same red color at the core as on the out side, which makes it very desirable. It is of high quality and has sufficient foliage for bunching for local or long distance shipping. Our market garden friends will be pleased with this new carrot. Pkt. 10c, oz. 20c, $\frac{1}{4}$ lb. 63c, lb. \$1.85.

Improved Danvers. One of the best for market, also good for home use and stock feeding, as it is a very heavy yielder. Roots 6 to 8 inches long tapering to a blunt point, color orange-red, smooth and of good quality. One of the reliable older varieties. Sometimes called Danvers Half Long. Pkt. 6c, oz. 12c, $\frac{1}{4}$ lb. 33c lb. \$1.00, 5 lbs. \$4.18, 10 lbs. \$7.78.

IMPROVED LONG ORANGE. Grows 12 inches long, often 3 inches in diameter at the crown, tapering to a point. Color orange, quality good; we recommend this only for deep soil. It is good for stock feeding as it yields well but most too long for market. Pkt. 6c, oz. 12c, $\frac{1}{4}$ lb. 33c, lb. 90c, 5 lbs. \$3.93, 10 lbs. \$7.28.

Ford's Early Sweet Corn

FORD'S SOUND SWEET CORN

For a good many years we have been specially interested in developing new varieties of Sweet Corn. A good many experiments have been made, and from all of these we have retained four sorts that we can recommend to all our friends—Ford's Early, Ford's Golden Sugar, Ford's Nectar and Ford's Improved Mammoth. These four Sweet Corns will keep your table supplied from early summer until late September, or even into October.

Sweet Corn should be planted from May 1 to July 1, in hills 3 to 4 feet apart each way, 5 kernels to a hill, covering an inch deep. When the plants are 4 to 5 inches tall, pull out all but two or three. Cultivate frequently.

One pound of seed will plant about 200 hills; 12 pounds for an acre. As there is no legal weight for Sweet Corn, we quote it by the pound. Different varieties vary in weight per measured bushel, from 40 to 48 pounds.

Prices on corn in 10 lb. lots or under include postage. If to go by express or called for at our store, deduct 5c from $\frac{1}{2}$ lb., 10c from lb., 14c from 3 lbs., 18c from 5 lbs., 28c from 10 lbs.

SEMESAN JR. will prevent root rot, smut and other fungus diseases of corn either Sweet or Field varieties. You treat the seed before planting, it usually pays to use it. As it is a poison it cannot be mailed. $\frac{1}{4}$ lb. 50c, lb. \$1.75 5 lbs. \$8.00, 25 lbs. \$37.50.

Ford's Early. Ready for use in 60 to 65 days after planting. Scores of our customers who know this variety say that it surpasses all other early white Sweet Corns in quality. The ears are from 8 to 10 inches long, and contain 8 rows of pure white kernels, which are large and extra deep for an early Corn. The stalks grow 5 to 6 feet high, can be planted more thickly than most varieties, and frequently produce two ears to the stalk. On account of its earliness, size and quality, it is unsurpassed by any variety for home use or market purposes. Many of our market-garden customers practically monopolize the early trade in Sweet Corn by growing Ford's Early. It very frequently sells for 50c per doz. on the early market. If the seed is planted at intervals of about two weeks through the season, Ford's Early will furnish a succession of Sweet Corn until frost kills the plants. See illustration at the left. Pkt. 10c, $\frac{1}{2}$ lb. 17c, lb. 30c, 3 lbs. 71c, 5 lbs. \$1.08, 10 lbs. \$1.98 prepaid. Not prepaid 12 lbs. \$2.04, 50 lbs. \$7.50, 100 lbs. \$14.00.

Nectar. The grandest of all second-early Sweet Corns: Graw, of New York, in 1906; it is a cross between Malak-hoff and White Evergreen. It is unusually productive. It is very hardy and will stand more wet and cold weather without rotting in the ground than many early varieties. The stalks grow from 6 to 7 feet high, and many of them produce two large ears. There are usually 12 or 14 rows of very deep, pure white kernels, resembling Stowell's Evergreen. For market-gardening this is the best second early variety to follow Ford's Early. The ears will remain in good condition for some time after they are ready for the table. Pkt. 10c, $\frac{1}{2}$ lb. 35c, lb. 65c. Crop short.

Ford's Golden Sugar. This new Corn is a cross between the White Evergreen and Golden Bantam. In 1915 we offered it for sale for the first time and it has given excellent satisfaction to those who have grown it. It is sufficient to say that of all the yellow Sweet Corns you will like this the best. The stalk grows 6 to 7 feet tall; ears are of good size, larger than Golden Bantam, and mature a little later than that variety. Thus it would be classed as a medium late variety. It is of a rich golden color, and our customers say it is the finest flavored yellow Sweet Corn they have grown. Prices same as Ford's Early.

GOLDEN BANTAM. Well-known yellow variety, with small stalks. Ears are usually not more than 5 inches long, but the grains are quite broad and exceedingly sweet. Ready for the table just after Ford's Early starts. This is the most widely known yellow variety of sweet corn. Price same as Ford's Early.

FORD'S IMPROVED MAMMOTH

A late all-round, every purpose variety. For market, for canning, drying, or other home uses, the quality is unexcelled. Price same as Ford's Early.

COUNTRY GENTLEMAN. White, very sweet. Matures just before Evergreen. Kernels set irregularly on the cob. This is an old standby, of which we have a decidedly fine strain. Price same as Ford's Early.

Barden's Wonder Bantam, a Most Valuable Sweet Corn

Barden's Wonder Bantam. If we add another variety to the Ford's Four Leaders it would be Barden's Wonder Bantam. It is almost identical to Ford's Early in earliness, size of ear and growth of stalk, but it is of a golden yellow color. Being a descendant of the well known Golden Bantam it has retained all the fine qualities of that variety, but produces eight rowed ears 8 to 10 inches long of fine quality. As it has such fine long ears it is a wonderful market or home use variety that is sure to please all who use it. Pkt. 10c, ½ lb. 18c, lb. 33c, 3 lbs. 77c, 5 lbs. \$1.18, 10 lbs. \$2.18 prepaid. FORD'S SOUND CUCUMBER SEED

Grown from Carefully Selected Stock Seed
It Pleases the Most Critical Market Gardeners

CULTURE. For early cucumbers start the seeds in a hotbed about the first to middle of April. 4-inch paper or clay pots may be used or squares of sod with grass side down. Plant 10 or 12 seeds in each pot. Transplant to open ground when danger of frost is past, spacing the hills at least 4 feet apart each way; allow only 4 or 5 plants to grow in a hill. For first out-of-door planting May 15 is about the earliest safe date. Plantings may be made at intervals of two or three weeks up to July 10. For main crop for pickles we have found June 20 to July 10 most satisfactory. As soon as young plants are up watch out for the striped bugs. **HAMMOND'S SLUG SHOT** dusted on the plants destroys the bugs. We sell this prepaid 5 lb. packages 68c. Not prepaid 5 lbs. 50c.

FORD'S SOUND LETTUCE SEED

Lettuce may be grown in hot-beds in winter, but for ordinary garden sow as soon as spring opens and thereafter in succession once in two or three weeks. Make the rows 15 inches apart and cover $\frac{1}{2}$ inch deep with fine soil, which should be firmed above the seeds. When the plants are up thin out to 3 or 4 inches apart and when those remaining are large enough for use, every other one may be taken out and leave room for the remaining ones to grow.

The head varieties should have 10 to 12 inches of space between the plants to form good heads.

1 lb. Semesan, 5 lbs. Hammond's Slug Shot, 25 lbs. Vigoro, 1 Antrol Set. Cannot be mailed. Not prepaid. For \$5.43.

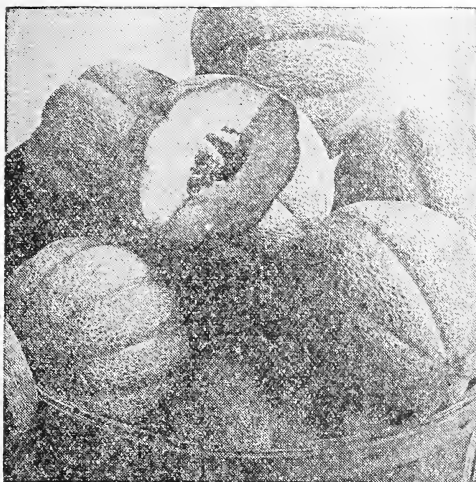

FORD'S MUSKMELONS

Melons are strictly a tropical fruit, and there is no use in planting the seed before the ground is warm. The middle of May is plenty early enough to put in the seed, but if extra-early melons are desired, the seed may be sown in a hotbed on sod and transplanted in the same manner as cucumbers. The hills should be made at least 6 feet apart each way for Muskmelons, and 8 feet for Watermelons. The hills should be prepared in practically the same way as for cucumbers. When the plants come up and danger of bugs is over, thin them out to three or four plants to the hill. Hammond's Slug-Shot, sprinkled freely over the young plants, will prevent serious damage by the bugs and will not injure the plants. Spraying with Bordo will prevent blight. We can supply both of these. See quotations elsewhere in this book.

PRICES quoted include pre-payment of postage. If to be shipped by express or freight deduct 3c from $\frac{1}{4}$ lb., 10c from lb., 18c from 5 lbs., 28c from 10 lbs.

Sugar Rock. This is a new variety of delicious quality and sweetness. It is very productive, ripening in 85 days. The fruits are oval in form, without ribs, and are heavily netted, medium size, just right for

table or market; flesh is rich deep orange, with a sweet, delicious flavor not surpassed by any variety. A wonderful shipper and home use variety. Originator's seed. Pkt. 10c, oz. 30c, $\frac{1}{4}$ lb. 93c, lb. \$2.60.

Golden Champlain

Golden Champlain. Very early, and brings in the money before other kinds start ripening. It is a hardy and vigorous grower, yields heavily, having produced crops returning \$700 to \$1,000 per acre. The melons are of good size, ribbed, skin dark green, overlaid with heavy netting, giving them an attractive appearance. The flesh is a rich golden color, free from stringiness, fine grained, melting, juicy, sweet, delicious flavor clear to the rind.

"The Golden Champlain Melon is three weeks earlier than any other varieties we raise. Had the reputation of being the finest quality melon on the market and always commanded the highest prices. We realized at the rate of \$1,000 per acre on our Golden Champlain, while other varieties only \$150 per acre, due to vines dying before later melons ripened." J. M. R., Lewisberry, Pa. From all directions come reports of the extreme earliness of this melon.

The quality of all Muskmelons varies on different kinds of soil.

FORD'S SOUND ONION SEED

It is of the utmost importance to use good seed, not only good, strong-growing seed, but seed that has been saved from good, well-ripened, and selected Onions. We offer the best possible strains, and have taken particular care in the selection of all the varieties we list herewith.

Prices on Onion Seed include postage. If to be shipped by express or freight or called for at our store deduct from prices quoted 3c from $\frac{1}{4}$ lb., 10c from 1 lb., 18c from 5 lbs., 25c from 10 lbs.

CULTURE. Onions require a fertile soil, well pulverized and drained. Sow in rows 12 to 15 inches apart, covering the seed $\frac{1}{4}$ inch deep. When the plants are 3 or 4 inches high thin them out where too thick in the row. Cultivate thoroughly. 1 oz. will sow 200 ft. of row, 3 or 5 lbs. per acre.

STOP VERMIN sown in the row with seed keeps the onion maggot away. Spraying with "Ever-green" or "Black Leaf 40" destroys the thrip. But seldom is spraying necessary.

ONION PLANTS

Yellow Bermuda

Onion plants are becoming more popular each year and taking the place of onion sets to a considerable extent. They make onions two weeks quicker than sets and four or five weeks quicker than seed. Hence the advantage of the plants.

We grow these in the South and can ship any time from Jan. to May. Our sales of these have increased from year to year and our customers are enthusiastic over the crops grown from them. The early crops bring the high price.

Onion plants may be planted early. Even if frozen down they come on again and make good crops. For small gardens these may be planted in rows 6 inches apart and 3 inches apart in the rows.

All Onion plants are tied in bunches estimated to contain 100 plants. Some run over, some under. Orders should be for even hundreds.

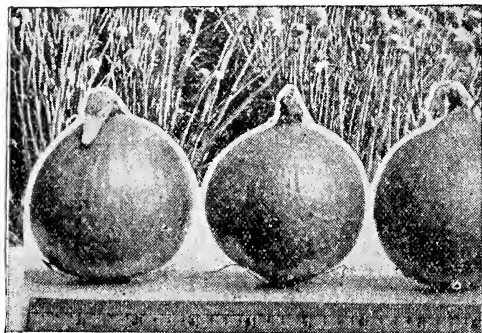

Onion Plants are GUARANTEED to reach you in good condition, if you are not satisfied your order will be refilled free of charge.

Price prepaid, 100 plants 30c, 200 for 55c, 300 for 80c, 500 for \$1.25, 1,000 for \$2.25. Not prepaid, 100 for 25c, 200 for 45c, 300 for 65c, 500 for \$1.00, 1,000 or over at \$1.50 per 1,000, crate of 6,000 for \$6.00. Ask for prices on large quantities.

CERTIFIED SEED POTATOES

The term "Certified" as applied to Seed Potatoes implies that the crops while growing and after digging have been inspected by good authorities and have been found comparatively free from any disease.

To pass inspection these crops must be vigorous to withstand the ravages of disease. This vigor gives to the seed the ability to produce big crops increasing the yield per acre 30 to 80 bushels according to the variety.

The increased yield more than pays for the seed even at the higher price of the certified seed. The crop raised from it is of better quality and sells at the highest price.

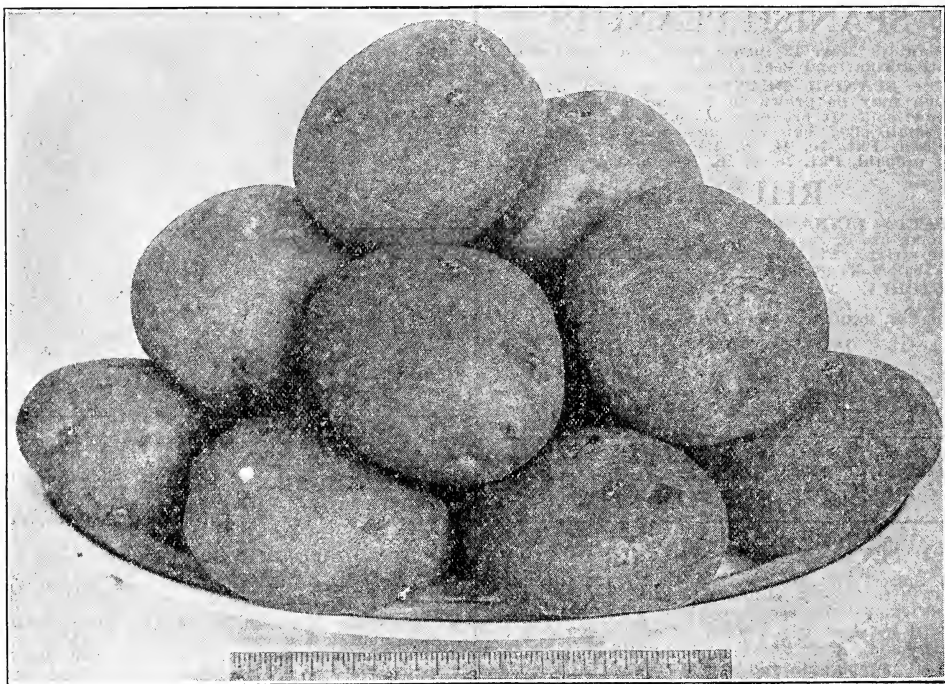

We always try to have the best of everything and believe in handling Certified Seed Potatoes, we are giving our customers the best possible in seed potatoes.

All orders should be in early. Increase your yield by planting Certified seed this year.

Prices are unsettled at time of making up this catalog. Write for quotations if interested.

SEMESAN BEL. For the prevention of scab and other fungus diseases of potatoes is the most satisfactory treatment yet discovered. It not only prevents disease but increases the yield. 1 lb. is sufficient to treat 16 to 20 bushels of potatoes. Cannot be mailed. 1 lb. \$1.75, 5 lbs. \$8.00, 25 lbs. \$31.25, 50 lbs. \$60.00, 100 lbs. \$120.00. Ask for leaflet on Semesan Bel if interested.

Sunflower Seed Is An Excellent Poultry Food

FORD'S SELECT TOMATO SEED

Our list is comprised of the very best of the older and newer varieties. It is our aim to keep our list down to the very best varieties. Tomato seed is one of our specialties and for this reason we are satisfied with none but the best seed, of well tested varieties.

CULTURE—Sow seed in hotbed in March or April, in rows 3 inches apart, covering the seed $\frac{1}{4}$ -inch deep. Water with quite warm water. When the plants are 2 inches high, transplant into flats 2 to 4 inches apart, or into 3 or 4 in. pots. Set in open ground when all danger of frost is over, in rows 4 to 5 feet apart and 3 feet apart in the row. Sprinkle a handful of ground bone in each hole before setting the plant. Tomatoes may be tied up to stakes with soft twine, and for the home-garden it is a good plan as the plants may be set closer together than if allowed to run at random.

PRICES on all seeds include postage unless otherwise quoted. If to go by express or freight or if called for by our store, deduct 3c from $\frac{1}{4}$ lb., 10c from lb., 18c from 5 lbs., 28c from 10 lbs.

Good Type of Bonny Best

Marvelosa. The best pink tomato that we know of for any purpose. Its disease resistant qualities make a long fruiting season. It is perfectly smooth, solid, ripens up nicely around the stem and does not crack badly. In the height of the season it sold at 75c per half bu. basket while others were selling at 30c to 35c. It is of finest quality for home use, canning, or market. It has a delicious mild flavor, less acid than most varieties. Of a beautiful pink color. No one should fail to try this grand variety. Pkt. 10c, $\frac{1}{2}$ oz. 35c, oz. 60c, $\frac{1}{4}$ lb. \$1.78, lb. \$6.00.

Marglobe. A main crop, disease resistant variety that will be sure to please you. A vigorous grower, large yielder, fruits globular, large size, solid, very smooth, bright red color. Ripens up nicely around the stem and very free from cracks. A good shipping and market variety, also excellent for home use or canning. Very similar to Marvelous except in color. A NINETY DAY YELLOW CORN

Safe for Northern Ohio, Pennsylvania, Indiana, Michigan and New York.

A VARIETY OF OUTSTANDING MERIT

On March 13, 1923, our grower of this variety in Northern Ohio wrote us: "We planted 160 acres of this corn the past season and in one of the poorest corn years (1927) we have ever had, it proved to us, all that we claimed for it. The color is so beautiful that we gave it the name of Clark's Early Orange Dent."

This new corn ripens in 90 days from time of planting.

We honestly believe that in the "Clark's Early Orange Dent" we have the earliest yellow corn, one that our northern growers may safely plant and be sure of a crop of ripe corn year after year. See illustration on front cover.

DESCRIPTION—Stalks 9 to 10 ft. tall, height of ears from ground 4 to 5 ft., length of ears 7 to 9 inches, 16 to 20 rows of kernels, small red cob, matures in 85 to 95 days according to season.

Our grower reports that it is "Best Quality," "Purest Type" and "Most Beautiful" corn in cultivation. "Farmers who have grown it for the past two years will grow no other kind." "For the past three years it has out-yielded any other variety in Northern Ohio."

It has given excellent results and we are now more enthusiastic than ever about it.

It is a heavy yielder both of ears and shelled corn, and on account of its beautiful golden color brings top price in market.

We offer this corn to our customers, with the utmost confidence that it will prove entirely satisfactory to all who plant it. Price prepaid lb. 25c, 3 lbs. 59c, 5 lbs. 78c. Not prepaid ½ pk. (7 lbs.) 65c, pk. (14 lbs.) \$1.30, ½ bu. (28 lbs.) \$2.30, bu. (56 lbs.) \$4.50, 2 bu. \$8.50.

Choice Northern Ohio grown seed. Price same as Clark's Early Orange Dent.

WHITE CAP YELLOW DENT. Stalks 6 to 9 feet tall, ears 7 to 10 inches long. Kernels light yellow with white cap. We consider this a perfectly safe corn to plant for a grain crop. ENSILAGE CORN

Cutting Old Virginia Corn

FORD'S OLD VIRGINIA ENSILAGE CORN

The Dairyman's Most Profitable Crop

Some of our largest dairymen declare, that **FORD'S OLD VIRGINIA** Ensilage Corn is superior to any other variety, being much sweeter, larger ears, keeps better in the silo and produces the largest amount of milk and meat. It is unexcelled for dairy feeding and produces more tons of rich, juicy silage than other varieties.

We cannot exaggerate the merits of this wonderful corn for silage purposes.

We first introduced this corn to the dairymen of Ohio and have been headquarters for the **TRUE OLD VIRGINIA** for many years.

We sell thousands of bushels of the **OLD VIRGINIA** every year, which would be impossible if it did not give perfect satisfaction.

IF YOU WANT TO FILL YOUR SILO FROM FEWER ACRES, PLANT FORD'S OLD VIRGINIA.

In the past there has been quite a lot of white corn sold as Old Virginia, which did not measure up to the standard. Be sure you get the true Old Virginia from headquarters.

Our seed is exceptionally choice and of strong vitality. If you are not satisfied with it when received return it and your money will be cheerfully refunded.

On the Belmont County (Ohio) Experiment Farm in 1926 Old Virginia Corn yielded 16.1 tons per acre on land which had been planted to corn continuously since 1917.

In 1917 this field was planted to Clarage and yielded 10 tons per acre. In 1921 to Dark County Mammoth and yielded 8 tons per acre. In 1922 to Eureka and yielded 11.8 tons per acre. The other six years during this period it was planted to Leaming which produced an average yield of 7.2 tons per acre. The highest in any one year of Leaming was 8.9 tons per acre.

Below we give a few testimonials from those who have put Old Virginia to the test.

Ford's Old Virginia, Biggest Yelder; Makes the Most and Best Ensilage

"This is Old Virginia Ensilage Corn. 13 feet 4 inches high (off year). We have had it 14 feet 2 inches high. We used to plant 5 acres to fill a silo 10x28 feet; now 2 acres of Old Virginia fills it up chockfull and some to spare."—Harlon Shelley, New York.

"I have used Old Virginia Corn for two seasons. Last year I filled a 10x36 silo from 1½ acres. This corn grew to a height of 15 feet. A good many of my neighbors are sending to you for Old Virginia on account of this wonderful field of corn."—R. E. Fritzel, Ohio.

"Last year I bought a bushel of Old Virginia Seed Corn and I raised enough Corn to fill one silo 10x30 and one 10x24 on 6 acres. Many stalks were 17 feet long. Believe it was the biggest Corn grown in this country last year. It pays to buy good seed."—W. L. Stearns, Ohio.

"Last year I planted 8 acres in Old Virginia Corn and filled two silos holding 124 tons and had at least 15 tons left. Now I am ordering for myself and four of my neighbors. Next year

you will have a big demand from this section of Country."—Jas. McGhee, Ohio.

"We tried your seeds a year ago, and they were certainly fine. The Old Virginia Ensilage Corn grew stalks 16½ feet tall. Four acres, checked, three stalks in a hill, filled an 80 ton silo, and made excellent feed. It was the biggest piece of Corn I ever raised."—Earl A. Valentine, Mich.

"I have tried Old Virginia before, and can say that it produces large crops for the silo."—Deleus Anderson, Minn.

"CRO-TOX"

Prevents Birds and Animals From Pulling Young Corn

It drives blackbirds, crows and other corn-pulling birds and animals away from the corn hills and prevents the havoc which often destroys the corn field and makes replanting necessary. "Cro-tox" Repellent protects the corn grower against this great loss.

It is non-poisonous and will not injure the seed, it aids germination and makes healthier stalks.

Put the seed corn in a pan or tub, pour "Cro-tox" Repellent over the corn and mix thoroughly. The corn if planted immediately will not clog the planter. "Cro-tox" is

fully guaranteed by the manufacturers to give entire satisfaction.

Ford's Sound Flower Seed

DIRECTIONS FOR GROWING

More flower seeds are probably destroyed by planting too deeply than by any other one cause. Such small seeds as Petunia, should be merely covered lightly, whether in open ground or in boxes. In preparing the ground, provide very fine soil, pressed down lightly and evenly and moistened thoroughly with warm water. When the water has soaked away, sow the seed; cover evenly with fine, dry soil not over 1-16 inch for the finest seeds and $\frac{1}{2}$ inch for seed the size of Pansy seed.

If the bed is small enough lay glass flat on the surface; this will keep the ground from baking and will prevent washing in heavy rains. When growth has begun, lift the glass slightly by propping it with something and when it is finally removed the young plants should be shaded with thin cloth or paper if the sun is very hot. Keep the bed well weeded, and the soil frequently stirred to prevent the formation of crust.

Young plants are liable to "damp off" and should be watched carefully. If the seed is treated with "SEMESAN" and the soil sprinkled with "SEMESAN" it will prevent this disease to a large extent. You will find "SEMESAN" quoted elsewhere in this catalog.

"SHEEP MANURE" is a safe and very effective fertilizer for flowers of all kinds. See quotations elsewhere.

For convenience in ordering we give each variety a number, which should be used in place of the name. This will help us in filling orders and will also prevent mistakes. Abbreviations are as follows: A., annuals, or plants which live only one year; B., biennials, or plants which live two years; H., hardy; H. H., half-hardy; P., perennial or hardy plants, which live for a number of years; M. indicates several varieties mixed in the packet. All seeds in the following list will be sent postage prepaid. Order by number.

GIANTS OF CALIFORNIA

These are truly aristocrats amongst Asters. The flowers often measuring six inches across with broad wavy petals, on long stems often 2 feet in length. Comparing favorably with well grown Chrysanthemums.

The Giants of California stand at the head of the list for florists' use and also for private gardeners who want the finest Asters of all. The non-lateral branching stems and sturdy habit of growth make them a very desirable variety for cutting.

The White is exceptionally large and distinct. Peach Blossom opens as a white and flushes pink when in full bloom, presenting a variety of delicate peach blossom shades on the same plant. Light Blue is an exceptionally fine florists' flower; the color, although delicate, has a sufficient degree of intensity to please the most critical eye.

Rose is a very rich deep shade. All in all the Giants of California is a most wonderful class of Asters.

We can supply them in the following colors:

STRAWBERRIES

We guarantee the safe arrival of these plants. Should they fail to grow we will replace them at one-half price if ordered before the spring shipping season of the following year is over. We do not handle Strawberry plants in the fall. Varieties marked (P) are Pistillate and require some Bisexual (B) variety planted near them in order to produce fruit.

DR. BURRILL. (B) This is an improved Senator Dunlap and what may be said of the latter will apply also to the Dr. Burrill. It produces lots of plants and yields large crops. It ripens medium-early. Fruit is of good size, firm, dark, glossy red, of even shape and high quality. One of the real good older varieties.

GIBSON. (B) A leading market variety either for home or distant shipping, as it is firm and holds up well. An abundant bearer, the vines which are strong are loaded with fruit of large size, which is dark glossy red, extending clear through to the heart. Especially valuable for canning. It has been thoroughly tried and proven a success in all kinds of soil. It ripens medium late.

PEARL. (B) Latest of the June bearing varieties. Large size, dark red, firm. Coming as it does so late it sells for high price.

PREMIER. (B) The earliest of all. Too much praise cannot be given this most wonderful early berry. While extremely early it seems to be frost resistant. It has given perfect satisfaction wherever grown, and produces abundant crops. The berries are large, bright red color, sweet, of fine quality, and very uniform in shape and size. It is an all around strawberry, good for market, table use or canning. A money maker for the commercial grower.

SAMPLE. (P) Large; firm; commences to ripen in mid-season, and continues till late; healthy; fruit good quality. One acre produced 30,000 quarts 30 months from planting. No berry has stood the test under all conditions better than the Sample.

WM. BELT. (B) A berry of finest quality, usually conical form, sometimes cockscombed. Large; dark red, good for market or home use.

MASTODON EVERBEARING B

The largest of all Everbearing Strawberries. 18 berries have filled a quart basket. It bears from August till freezing weather stops it the same year as planted and then again the following June and again in the fall. The berries are not only large but are of fine quality and bright red attractive color. The plant is vigorous and very productive, more so than any other Everbearing variety. The proper way to treat the plants after setting is to keep all blossoms picked off until July. Then they will continue to blossom and bear fruit till snow flies. You will find a lot of satisfaction in this wonderful berry either for home use or market. It has proven a really profitable variety for fall market.

RARE AND BEAUTIFUL ROSES

The Most Popular of the Tested and Approved Varieties

The plants which we offer below are grown on their own roots and have many advantages over budded plants. One of the greatest of these is the fact that whether they grow from the root or top they will be the same variety.

These plants are pot grown and while not as large as budded plants they give splendid results, cost much less, and bloom as well. For the past two years we have sold thousands of these roses and they have been very satisfactory. We can fill orders any time during the spring, summer or fall, with these plants.

Notice our Golden Jubilee Prices. The first price quoted is for 1 yr. plants from 2 1/4 in. pots. The second price is for 2 yr. plants from 4 in. pots. You can buy roses liberally at these prices.

Don't Let Bugs and Blight Ruin Your Crops

SEED DISINFECTANTS

These are the successful result of a deliberate and painstaking determination by some of the world's foremost agricultural chemists to discover and invent the finest seed disinfectants that science can devise. Ask for booklet giving further information in regard to Semesan products. As these are all poisonous they can not be mailed.

Semesan has inherently superior disease disinfection properties that are possessed by no other chemical now known. It is amazingly effective against an enormous array of fungus growths, disease germs and over micro-organisms without at the same time being harmful to the higher forms of life to which the seeds and plants belong. Of tremendous interest to the user is the fact that with Semesan, the need for a specific remedy to treat each type of disease is no longer present because Semesan covers practically the entire range of the grower's requirements. Moreover, the facility with which Semesan can be applied is an enormous advantage to the consumer since it is the only disinfectant that can be employed in either dust or liquid form. Price, 2 oz. 50c, 1 lb. \$2.75, 5 lbs. \$13.00.

Semesan, Jr., a modified form of the was developed specifically for the easy dust disinfection of field and sweet corn to prevent the common ear, root and stalk rots. Semesan Jr. not only effectively controls corn diseases but it also stimulates seedling and plant growth, promotes earlier maturity, improves quality and increases yields. Tests conducted by the U. S. Department of Agriculture prove and confirm the excellent results reported by farmers from every section of the country. 2 oz. for each bushel of corn. Price 4 oz. 50c, 1 lb. \$1.75, 5 lbs. \$8.00, 25 lbs. \$31.25.

Semesan Bel is the instantaneous dip disinfectant that has taken the potato-growing sections of the United States by storm. Easily and quickly applied by the dust or liquid methods, preferably the latter, Semesan Bel controls the common seed-borne diseases of white and sweet potatoes, as well as of other roots and tubers of flowers and edible plants. It preserves the seed piece against soil-borne organisms, stimulates sprouting, induces earlier maturity and increases the yield of finer, disease-free, unblemished crops. 1-lb. will treat 15 to 20 bushels of potatoes. Price, 1 lb. \$1.75, 5 lbs. \$8.00, 25 lbs. \$31.25.

Ceresan controls bunt or stinking smut in wheat, stripe disease, loose and covered smut of barley, loose and covered smut of oats, kernel smut of sorghum, seed borne stem smut of rye. It is applied as a dust, no mixing with water.

Ceresan is economical to use. For wheat, rye and sorghum only 2 ounces of Ceresan are required for each bushel of seed. For oats and barley only 3 ounces of Ceresan per bushel of seed are needed.

The low cost of Ceresan, its remarkable control of important cereal diseases, its adaptability to the treatment of most grains, and its ease of application, justify its use by every grower of cereals. Price, 1 lb. 75c, 5 lbs. \$3.00, 25 lbs. \$12.50, 10 lbs. \$49.00.

THE "FORD" PEAR

PRACTICALLY SEEDLESS and CORELESS—Excellent Quality, Beautiful Color, Good Seller, Splendid Canner, No Waste, Tree Hardy

FORD PEAR greatly reduced and cross section showing absence of core and seeds.

This is one of our introductions which we want everyone who reads this catalog to plant, and in order to have it thoroughly disseminated we are offering: **One Root Graft Free with Every Order of \$5.00 or Over.** While the few thousand we have set aside for this purpose last and if asked for when order is given.

The **FORD** is practically free from seeds, occasionally there will be found one or two in a fruit. There is also no core to speak of. The illustration of this Pear was made direct from a photograph and shows a section of a specimen cut through the center. Notice that it shows no core or seeds at all. The absence of core and seeds makes the **FORD** a splendid Pear to can, as there is practically no waste. The quality of the **FORD** Pear is rich, sweet and juicy, and the color is a rich yellow when fully ripe. It is similar in appearance to the Bartlett, but has a distinct flavor and is three weeks later.

Being very desirous to have this pear grown by all our customers we have made up a few thousand root grafts which can be sent easily by mail and if set so that only 2 inches of the graft is above ground they will grow into nice trees very quickly. **Price Root Grafts, each 25c, 3 for 50c, 7 for \$1.00, 15 for \$2.00.**

MULCH PAPER

Gator Hide. The importance of mulching as a means of conserving moisture and controlling weeds has been recognized for many years. Many materials have been used, but Gator Hide Mulch Paper is a decided advance over all other material.

Gator Hide Mulch Paper, because of its black color, absorbs solar heat and transmits it to the ground with which it is in close contact, thereby raising the soil temperature. When the sun does not shine the paper acts as a blanket, tending to retard the radiation of heat from the soil, resulting in more even soil temperatures which are conducive to rapid germination of seeds and growth of plants.

The higher and more even soil temperatures create ideal conditions for the beneficial soil organisms, and consequently more food is made available for the plants.

Gator Hide Mulch Paper conserves soil moisture by checking evaporation from the soil. Such conservation of moisture is practically always beneficial, and in times of drought it means the difference between success and failure for the gardener.

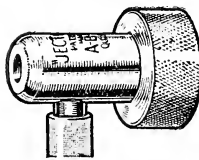

Leaching is reduced to a minimum when Gator Hide Mulch Paper is used and the activities of soil organisms are stimulated, producing larger yields and earlier maturity. Prices given are not prepaid.

NOC-OUT

Fertilizer and Lawn Seed Distributor

is simple in construction, inexpensive, is easily operated and with it fertilizers and Lawn Grass Seed are applied to the soil quickly, evenly and economically. Every Gardener, Trucker and Farmer using commercial fertilizers will welcome this appliance as it will not only quickly pay for itself in the saving of material by even distribution, but it also eliminates the wasteful, laborious, slow and unsanitary way of handling with the hands.

The "NOC-OUT" is equipped with an adjustable Feed Gauge by which the flow of materials can be regulated as desired.

The "NOC-OUT" overcomes clogging by means of an oscillating "knocker" which sets up a vigorous vibration when operated by short to-and-fro or small circular movements. The result is a steady, uniform flow through feed regulator. Price Prepaid \$1.35. Not Prepaid \$1.25.

DUST AND SPRAY MASK

Dr. Willson's mask is comfortable, light in weight and easily adjusted. It does not interfere with either vision or speech and is far superior to the old sponge type of rubber respirator. It is also much safer to wear during dusting or spraying operations than cloths or handkerchiefs over the face.

The mask is made of light, flexible rubber with an automatic metal spring adjustment that fits the mask closely to the nose and face. It has two ingenious valves to permit free out-pour of exhaled air and to avoid the rebreathing of stale air. The filtration of incoming air is accomplished by the use of special cotton filtering disks, expressly made for this purpose.

When the outer surface of the filter becomes coated with dust, it is easily renewed by inserting a new filter disk. If necessary for extra protection, two filters may be used instead of one—and still there will be no appreciable obstruction to free breathing. Every farmer should wear this mask when threshing, handling dusty crops, fertilizing and cleaning hen coops and silos, as well as when applying chemical dusts or sprays. Price Mask, including 12 extra filters, Prepaid \$2.25. Not Prepaid \$2.15. Extra filters per box of 100 Prepaid \$1.15. Not Prepaid \$1.10.

LOOKING TOWARD THE FUTURE

As we look into the future, we cannot help but consider the welfare of our many friends and patrons, who for years have relied on the Ford Seed Co. and the service rendered by them. It is my desire to have this service continued for years to come.

Since issuing our first catalog fifty years ago, when I was nearly seventeen years old, I have been connected with Ford Seed Co. I grew up in it as a boy, and worked with my father, Frank Ford, before becoming a partner with him, and since his death in 1897 have been the manager of the business.

As the business has expanded from year to year, its management has become more strenuous, and I realize that sooner or later I must share these burdens with younger men.

This business has been my pleasure, and has kept me in good health, strength and spirits to this day (Nov. 8, 1930) which I am spending in Auburndale, Fla., on the shore of beautiful Lake Ariana, where I have been very busy working on this Golden Anniversary Catalog for the past 10 days. Soon I will return again to Ravenna, O., to take up my duties there.

Ravenna is one of the most desirable residential and business cities in North-Eastern Ohio, with its paved streets lined with beautiful trees and fine residences.

It has Fine Churches, Excellent Schools, Public Library, Pure Water, Natural Gas, Sewer System, Electric Lights, Reliable Banks, Good Stores of all kinds, Several lakes within easy reach.

Industrially Ravenna is well located with three railroads, Erie, Penna., and B. & O. Electric and bus lines. Paved roads leading in all directions. It is surrounded by fertile farms, upon which are grown abundant crops of all kinds.

I am looking forward to 1931 with the belief that it will be the biggest year in the history of our business, notwithstanding the general depression now so much talked about. My reason for this optimistic forward look is that our customers have been satisfied in the past, and I have made prices and special bargains in this book that will appeal, especially to all those who feel that economical buying is necessary.

If I could find a man, or better yet several men, who are honest, energetic, capable and willing to work, who have capital to take care of this business and "carry on" in a creditable manner, I would be willing to turn over the management of it to them before the infirmities of old age overtake me. I want to be sure that our present patrons and friends will be taken care of and that the business will be conducted in an honorable and upright manner before any one else assumes the management of it. I will stay at the helm if my life is spared and my health permits till such a manager may be found.

Young men desirous of launching into a well and favorably established business, with a 50 year reputation for square dealing could find no better business opportunity, providing their tastes are along these lines.

This business is most pleasant and interesting. New things coming up frequently to excite interest and enthusiasm.

Seeds, plants, bulbs and growing things have a fascination which no mechanical device approaches. If interested let me hear from you.

Sincerely and Faithfully Yours,

J. H. FORD.

BOUGHT SEEDS 50 YEARS AGO

Scott Wolfe and son, Arthur Wolfe, of Pine Grove, Pa., made a business and sight seeing visit in Ravenna Friday.

The Wolfe order comes as regularly as the return of the year, and the "Ford habit" has become a fixed inheritance with the family generations.
